DETAILS

SOUND-GALLERY im AUDIOOVERSUM

In the interactive AUDIOOVERSUM experience centre in Innsbruck, hearing becomes a fascinating

adventure. As a science centre, it combines medicine, technology, education and art and familiarises visitors from Austria and abroad with the importance of the sense of hearing in a playful way. Various audio installations can be heard in the SOUND GALLERY, framed by visual art. What does a choir singing in the Sistine Chapel, noises in the middle of the rainforest or the roar of wild animals sound like up close? In the innovative audio installation, listening becomes a 360-degree experience. The SOUND GALLERY can also be hired. Ideal for a seminar, team meeting or press conference. We are happy to accompany your event with a short guided tour through the acoustic world of experience. On request, we can also offer a small coffee service or arrange individual - cold - catering (breakfast, brunch or similar with drinks).

Bookable from MO - FR from 8 a.m. to 5 p.m. or by arrangement!
